DETAILED ACTION

Amendment

1. Receipt is acknowledged of the Amendment filed April 25, 2006.

Remarks

2. Claims 1-5, 7-15, and 46-67 are currently pending. Claims 1, 7, 9, and 13 have been amended to include allowable subject matter indicated in the previous Office action. There claims 1-5, 7-15, and 46-67 are allowable.

Allowable Subject Matter

3. 1-5, 7-15, and 46-67 are allowable.

The following is an examiner's for allowance: Prior art teaches an RFID where the system includes a low voltage signal stripping circuit included in the receiving circuitry for isolating the transponder signal form the excitation signal. The above identified prior art of record, taken alone, or in combination with any other prior art however, fails to teach or fairly suggest the specific features of claims 1-5, 7-15, and 46-67 are allowable of the present claimed invention. Specifically prior art fails to teach the reader wherein the feedback circuit has a first pathway including a first pair of clamping diodes aligned in series in a first direction, a second pathway including a second pair of clamping diodes aligned in series in a second direction opposite the first direction, and a third pathway including a feedback resistor. Further, prior art fails to teach the reader wherein the inlet resistor is a high voltage component and the amplifier and the feedback circuit are low voltage components. Lastly, prior art further fails to teach the reader including a summing node positioned upstream of the amplifier and downstream

of the inlet resistor, wherein the feedback circuit and the DC shift voltage or the DC shift current source to sum outputs from the inlet resistor, the feedback circuit, and the DC shift voltage or current source. Moreover, one of ordinary skill in the art would not have been motivated to come to the claimed invention.
